IRONWOOD GOURMET™ END GRAIN BOARDS

Besides being beautiful, end grain boards have even more advantages—both practical and cost-effective. Unlike traditionally made boards, end grain construction is less dulling to cutlery because the wood grain direction accommodates cutting instead of resisting it. (As the knife cuts, it slides into the direction of the grains instead of against them). Wear and tear is minimized on both cutlery and on the board, giving more longevity to all your cutting tools.

Carolina Chopping Board

This brute of a workstation utilizes end grain construction to give the durability needed to withstand the abuse from a cleaver. Neoprene coated feet and stainless steel grommet for hanging.
